
Error In Password For User Name WWW-X

- **Article Type:** General
 - **Product:** Aleph
-

Problem Symptoms:

When placing a real-time query, the x-server returns the message: "Error in password for user name WWW-X"

Cause:

⚠ The x-service USER_PASSWORD has been changed from its default: USER_PASSWORD=WWW-X

⚠ The www_x_util_get_param routine is looking for the parameters "USER_NAME=WWW-X" and "USER_PASSWORD=WWW-X"

Resolution:

Solution:

The x-service USER_PASSWORD should be reverted to "WWW-X"

Additional Information

If you need to specify different values, you can add "USER_NAME=" and "USER_PASSWORD=" parameters to your x-services query
