

Barcode: the hyphen (-) is read like apostrophe (')

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 18.01
-

Problem Symptoms:

When the barcode contains hyphen, in Aleph it's displayed like apostrophe.

Cause:

The barcode reader that is working in keyboard emulation is using the US keyboard layout while the PC is using different keyboard layout.

Resolution:

This is not an Aleph problem; it depends on the barcode reader.
