## Cannot discharge in Circulation; space quota issues

- **Article Type:** General
  - **Product:** Voyager
  - **Product Version:** All
- 

### Problem Symptoms

- Items can be renewed, but not discharged
- Fines and fees cannot be added manually or via Circulation batch jobs
- Circjob.log and/or alert\_VGER.log contain error: ORA-01536: space quota exceeded for tablespace 'XXXDB'
- Attempting to discharge item results in error: An error occurred while attempting to process discharge request

### Cause

XXXDB may be out of tablespace, or tablespace may not be set to autoextend.

### Resolution

Open a Case with Voyager Support for assistance

OR

1. Use UTIL menu to add tablespace:
2. SSH or telnet to server as voyager user.
3. `dlib xxxdb`
4. `util`
5. Type `o` (Oracle Management)
6. Type `c` (Check Oracle tablespace)
7. Enter oracle administrative user
8. Enter oracle password for system user

UTIL menu will check tablespace. If indicates that additional tablespace is needed:

9. Type Enter to return to Oracle Management menu
10. Type `A` (Add an Oracle datafile for xxxdb)
11. Enter oracle administrative user
12. Enter oracle password for system user
13. UTIL menu gives message:

```
About to create a new datafile for Voyager database voydb:  
alter tablespace VOYDB add datafile  
  './voydb_439.dbf' size 100M  
  autoextend on next 100M maxsize 4000M;
```

14. Type YES to continue.

UTIL menu adds datafile
