

856-links from AUT records in OPAC

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 22
-

Problem Symptoms:

When an AUT record has a 856 link (URL) the URL is also shown in index list of BIB library when you click on **Authority record** to view more information. Since version 22 (rep_change 2026) it is possible to click the URL to switch to the appropriate side.

Resolution:

In order to activate the new functionality change edit_doc_999_aut_<aut_lib>.lng table. Set column 10 value to M, for allowing electronic resource URI link activation.

Be aware that you have defined them also in edit_doc_999.lng and tab_buf_403 of the **aut** library.
