

Run time errors 65099 and 440 When Viewing Result Files

- **Product:** Voyager
-

Problem Symptoms

- GDC > Job Management > View Running/completed > job name > Get result files, produces Run time error 65099
- Followed by Run-time error 440.

Cause

This behavior may occur if the Global Data Change server needs more memory allocated.

Resolution

If you are experiencing these symptoms please open an incident with Voyager Support.
