

Job status in GUI batch queue incorrect

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Problem Symptoms:

Starting Load ALEPH Sequential MARC Records (manage-18) with an input file that does not exist leads to status "Success" and message "No errors" in the GUI batch queue. Only in server log \$alephe_scratch/xxxxx.p_manage_18.nnnnn you find the error message "File not found"

Cause:

Defect

Resolution:

Rep_change 2174 (Aleph 21)

?

Description: p_manage_18 (Load Aleph Sequential MARC Records) - The existence of the input file (provided as a parameter) is not checked before the batch is submitted.

?

Solution: This has been corrected.
