## base-amount from renew-order-encumbrance.trn always contains value e=encumbrance

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 21
- 

### Problem Symptoms:

When running Renew Order Encumbrances for Serials and Standing Orders (acq-06-b) parameter base-amount from renew-order-encumbrance.trn does not show the correct value (p=paid, e=encumbrance) but does always show e=encumbrance.

### Cause:

Missing parameters in renew-order-encumbrance.trn and renew-order-encumbrance.xml.

### Resolution:

```
- ./xxxnn/form_ing/renew-order-encumbrance.xml
change
<xsl:with-param name="value" select="./p-renew-based-on"/>
to
<xsl:with-param name="value" select="./base-amount"/>
- ./xxxnn/form_ing/renew-order-encumbrance.trn
add line
p-renew-bas
```

---

## Additional Information

The value for `<?p-renew-based-on?>` is only valid for the page header, it can not be used in a column of the report. So it should be added to the header of the report and be deleted from reports column.
