
Invoices and Orders don't take foreign exchange rates into consideration

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Problem Symptoms:

When you add a price in USD the local price is not calculated in EUR as it should.

Cause:

Wrong currency setting

Resolution:

In table \$alephe_root/aleph_start the local currency must be set to EUR instead of USD:

Change

```
setenv local_currency USD
```

to

```
setenv local_currency EUR
```

Do "source aleph_start" to activate this change.

Additional Information

To correct the local price in orders and invoices which were created while the parameter was set to USD run Update Local Price of Budget Transaction (acq-08)

Category: Acquisitions (500)

Subject: Invoices (500)
