

## System privileges in ELIB region

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 21
- 

### Problem Symptoms:

In the ELIB region system\_privileges is combined by the two files \$alephe\_tab/system\_privileges and local file \$alephe\_tab/system\_privileges.elib but adding entries only to system\_privileges.elib does not display them in the staff privileges window in GUI.

### Cause:

Defect

### Resolution:

Solved with rep\_change 2339 in Aleph 21.

Description: This fix is relevant only to Scandinavian customers. Entries from the \$aleph\_dev/aleph/tab/system\_privileges\_elib are not displayed in the GUI Access Rights window.

Solution: This has been corrected.

---

## Additional Information

Only relevant for Scandinavian customers

**Category:** Staff privileges (500)
