
Update /etc/acct/holidays with New Holidays

- **Article Type:** General
 - **Product:** Voyager
 - **Product Version:** 7.1.1
-

Problem Symptoms

Messages on the console:

```
adm: ***** ACCT ERRORS : see /var/adm/acct/nite/log*****  
adm:  
last message repeated 1 time
```

The log file has the following:

```
***UPDATE /etc/acct/holidays WITH NEW HOLIDAYS***
```

Cause

Incorrect year in /etc/acct/holidays

Resolution

1. Log into the server as the root user.
2. vi /etc/acct/holidays
3. Change the year to the current year, then write & quit (wq).

Additional information

Example:

```
# cat /etc/acct/holidays  
* @(#)holidays January 1, 2013
```

```
*
* Prime/Nonprime Table for UNIX Accounting System
*
