

Install Media Scheduling, receive Resource Validation Errors

- **Article Type:** General
 - **Product:** Voyager
 - **Product Version:** 8.2.0
-

Problem Symptoms:

Regular Voyager clients were installed without problems

Installing new Media Scheduling clients gives error:

Resource Validation Errors

Required Resource Error Condition

AuthorityCreation2008.12.dll File is missing

Cause:

Media Scheduling clients being installed are an older build than standard Voyager clients already on PC.

Resolution:

Download and install updated Media Scheduling clients.
