
Deep Link Not Displaying Volume in Correct Order

- **Article Type:** General
 - **Product:** Primo
 - **Product Version:** 4
-

Problem Symptoms:

Deep link not displaying volumes in correct order

Cause:

Deep link contains the wrong sort field code.

Resolution:

Remove the sortField=Iso01 from the deep link, for example, use

`http://<HOSTNAME>:1701/primo_library/libweb/action/dlSearch.do?institution=<INST>&vid=<view?-_id>&onCampus=false&query=lsr09,contains,<record_id>`

instead of

`http://<HOSTNAME>:1701/primo_library/libweb/action/dlSearch.do?institution=<INST>&vid=<view?-_id>&onCampus=false&query=lsr09,contains,<record_id>&srt=Iso01`
