

Reporter RTE when processing Circ transaction exceptions

- **Article Type:** General
 - **Product:** Voyager
 - **Product Version:** 7.1.1
-

Problem Symptoms:

When processing Circulation reports, Reporter gives error: "Run-time error '2580' - The record source 'T_R_Excpt' specified on this form or report does not exist"

Data in the crcrpts.Circ.inp file on the server is valid, and can be processed successfully on another PC with Reporter

Cause:

The crcrpts.mdb file has been changed or damaged

Resolution:

1. On PC, go to <C:\Voyager\Reporter>
2. Delete the MS Access file labeled crcrpts.mdb
3. Replace it with a clean copy of crcrpts.mdb
4. Process files in Reporter as usual
