
SFX targets not functioning when menu generated from bX in Primo

- **Article Type:** General
 - **Product:** bX
-

Problem Symptoms:

Recommendations appear in Primo with full text availability indicated for SFX

When linking back to SFX, active targets appear correctly

Selecting a target name in the SFX results in blank menu page rather than linking to target

Cause:

SFX Base URL in bX registration record for Primo application set incorrectly, contains an extra "/" at end of URL

Resolution:

Base URL should be in the format: `http://<hostname>/<instance>`

Category: SFX Configuration

Subject: Registration
