

OPAC interface Redirect to Another Server

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 21
-

Problem Symptoms:

OPAC interface of new Aleph server is redirected to old server

Cause:

Wrong server_httpd definition in www_server.conf

Resolution:

1. Check the server_httpd definition in \$alephe_root/www_server.conf
 2. Instead of a fixed IP & port address, use a format containing variable parameters:
setenv server_httpd [\\$HTTPD_PORT](http://$WWW_HOST)
 3. Restart the www_server (util w/3/1)
 4. Check the WWW_HOST parameter in \$alephe_root/aleph_start
