
When Running Patron Purge, "Segmentation Fault(core dump)"

- **Article Type:** General
 - **Product:** Voyager
 - **Product Version:** 7.2.5
-

Problem Symptoms:

When running Patron Purge (circjob 39), "Segmentation Fault (core dump)" occurs.

Patron records are not deleted from database.

Cause:

This behavior may occur if data in patron records being deleted cannot be processed.

Resolution:

If you are experiencing these symptoms, please open a support incident.
