## Bibliographic information in template acq-order-claim-01

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 20
- 

### Problem Symptoms:

The template acq-order-claim-01.xsl contains the entry `<xsl:call-template name="bib-info-hdr"/>` yet, when claiming (in the client) the bibliographic information of the order does not display in the printout acq-order-claim-01-08

### Cause:

Wrong configuration

### Resolution:

Adapt table `./xxx50/tab/bib_format`.

There you can define which format of the bibliographic information is taken.

Example of the default configuration (usm50):

```
acq-order-claim-01 300
acq-order-claim-02 300
acq-order-claim-03 300
acq-order-claim-04 300
acq-order-claim-05 300
acq-order-claim-06 300
acq-order-claim-07 300
acq-order-claim-08 300
acq-order-claim-09 300
```

### Note:

According to the table's header, section 300 is taken from the `edit_paragraph.lng` table:

```
! HELP
! This table defines the creation of the bibliographic format
! for administrative printouts.
! The system turns to the edit_paragraph.lng table for the
! display of the bibliographic information in the administrative
! printouts. Following is a list specifying the various forms.
! "default" is used if a relevant line is not found
!
! acq-order-claim-nn edit_paragraph
```

Therefore section 300 in `./xxx01/tab/edit_paragraph.lng` should be present:

```
!* BIB for acq order slip
```
