
Sub library code in PLIF file (Patron Loader)

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Problem Symptoms:

When customer tries to upload PLIF file into the database he is getting the following error messages

```
1 z303 Insert 00009951609 009951609 5003 Unable to process record due to problems in other records.
1 z308 Insert 00009951609 009951609 5003 Unable to process record due to problems in other records.
1 z308 Insert 00009951609 009951609 5003 Unable to process record due to problems in other records.
1 z308 Insert 00009951609 009951609 5003 Unable to process record due to problems in other records.
1 z304 Insert 00009951609 009951609 5003 Unable to process record due to problems in other records.
1 z304 Insert 00009951609 009951609 5003 Unable to process record due to problems in other records.
1 z305 Insert 00009951609 009951609 5021 check_z305 routine failed. Can not ins/upd record. cur-id 009951609.
```

Cause:

The code of the sublibrary is written in lower case letters

Resolution:

The code of sublibrary in z305-sub-library should be written in capital letters.
For example instead of abc50 you should write ABC50
