
Duplicated values in sub-library-address-1-occ for loan-notice-letter

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 21
-

Problem Symptoms:

Forms such as loan-notice-letter, have duplicated values in sub-library-address-1-occ.

Example:

XML file:

```
<sub-library-address-1-occ1>Ex Libris Library</sub-library-address-1-occ1>  
<sub-library-address-1-occ2>Gasstr. 18, Hs. 2</sub-library-address-1-occ2>  
<sub-library-address-1-occ3>22761 Hamburg</sub-library-address-1-occ3>  
<sub-library-address-1-occ4>Germany</sub-library-address-1-occ4>  
<sub-library-address-1-occ5>+49/ (0)40 89 809-0</sub-library-address-1-occ5>  
<sub-library-address-1-occ6>Ex Libris Library</sub-library-address-1-occ6>  
<sub-library-address-1-occ7>Gasstr. 18, Hs. 2</sub-library-address-1-occ7>  
<sub-library-address-1-occ8>22761 Hamburg</sub-library-address-1-occ8>  
<sub-library-address-1-occ9>Germany</sub-library-address-1-occ9>  
<sub-library-address-1-occ10>+49/ (0)40 89 809-0</sub-library-address-1-occ10>
```

Cause:

Configuration problem

Resolution:

The sub library address number and the available addresses in `./xxx50/tab/tab_sublibrary_address.lng` do not match

Change

`./xxx50/tab/form_sub_library_address`

loan-notice-letter 2

to

loan-notice-letter 1

corresponding to definition in `./xxx50/tab/tab_sublibrary_address.lng`
