
Field 856 appears twice in GUI full format

- **Article Type:** General
 - **Product:** Aleph
-

Problem Symptoms:

Field 856 appears twice in GUI full format.

Cause:

Configuration

Resolution:

In table xxx01/tab/edit_doc_999.lng field 856 is contained 2 times, once for display in GUI and once for display in Opac. Unfortunately the "W" (display in Opac) is in the wrong column and is therefore not recognized. This means that field 856 is displayed in GUI and Opac and so for the display in GUI both lines are considered.

```
## 856## D LExterne Datei Y M E W
```

```
## 856## D LExterne Datei Y E E G
```

Place the "W" in the right column and restart the PC server.
