

Login from Delivery doesn't work properly

- **Article Type:** General
 - **Product:** Rosetta
-

Problem Symptoms:

Login from an object returns to the PDS page instead of the object display.
Redirection of the links does not work as expected

Cause:

mod_jk has the following exception:
SetEnvIf Request_URI "/pds/*" no-jk

Resolution:

For the redirection PDS uses an URL with /goto and not /pds

1. Add to mod_jk this line:
SetEnvIf Request_URI "/goto/*" no-jk
 2. Restarted apache to load the change.
-

Additional Information

It is remanded to configure port 80 using load balancer and not mod-jk
