

Title does not always appear in Invoice QuickLineItem window

- **Article Type:** General
 - **Product:** Voyager
 - **Product Version:** 9
-

Problem Symptoms:

☹ Title only displays in the QuickLineItem window while the quick line item is being added; title will not display if line item is saved and then called up via Quick Line Item feature later.

Cause:

Working as designed.

Resolution:

This behavior is by design - if an operator needs to work in-depth on a line item, the "Detailed Line Item" feature should be used (which does display the title at the top of the window).

An enhancement that would always display the title in the QuickLineItem window may be included in a future release.
