

## Discrepancy in name authority record, find search

- **Article Type:** General
- **Product:** Aleph

### Problem Symptoms:

There are two authority records for the same person. Unpreferred terms are expanded into the BIB records as defined in xxx01/tab/tab\_expand with "expand\_doc\_bib\_accref". However when searching for one author name you can find all titles from both authors. When you search for the other author name you only find the BIB records of this author.

### Cause:

Word index entries

### Resolution:

Generally only unpreferred terms (fields 4nn) are taken into account for building index entries using expand\_doc\_bib\_accref but not see references (fields 5nn).

Example of a title where \$\$aBryans, Robin,\$\$d1928- is the preferred term:

001 L 000322784

1001 L \$\$aBryans, Robin,\$\$d1928-

24514 L \$\$aThe Azores /\$\$cRobin Bryans.

1001 L \$\$aBryans, Robert Harbinson,\$\$d1928- -> unpreferred term copied from AUT record field 400 using expand\_doc\_bib\_accref

Example of a title where \$\$aHarbinson, Robert,\$\$d1928- is the preferred term:

001 L 000322792

1001 L \$\$aHarbinson, Robert,\$\$d1928-

24510 L \$\$aSong of Erne /\$\$cRobert Harbinson.

-> No unpreferred term is copied from AUT record and therefore this record can't be found under "Bryans, Robin". This is because AUT record "Harbinson, Robert" doesn't have a 400 field with unpreferred term but only 500 field with see reference:

FMT L AU

LDR L ^^^^nz^^a^^^^^^n^^4500

001 L 000232313

005 L 20140211100446.0

008 L 051209|abacn||aab|||||||^^|aaa|||^d

1001 L \$\$aHarbinson, Robert,\$\$d1928-

5001 L \$\$aBryans, Robin,\$\$d1928-

5001 L \$\$aCameron, Donald,\$\$d1928-

The reason why you find all titles from both authors when you search for "Harbinson, Robert" is that the according AUT record has a 400 field which is expanded and in this field you find the keywords "Bryans, Robert Harbinson". So coincidentally "Robert Harbinson" is contained (as forname) in this field an therefore can be found.
