
Link to ISSBD item in OPAC brief list

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 21
-

Problem Symptoms:

Display of item information in OPAC is not available when a record is linked to another item with LKR ITM field and the item is a ISSBD item which was bound. Although parameter MATCH-Z30-ISSBD is set to 'Y' in tab100 item information is missing.

Cause:

Defect

Resolution:

Problem is solved with rep_change 2539 (Aleph 21) and rep_change 6 (Aleph 22):

Description: When the "ITM+" column is used in [BIB_Library]/tab/www_tab_short.Ing, the display of item information in OPAC brief records view is missing for linked bound items. This happens although parameter MATCH-Z30-ISSBD is set to "Y" in [ADM_library]/tab/tab100.

?

Solution: This has been corrected.
