

ARC 4.0: Drag and Drop does not work

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 4
-

Problem Symptoms:

Drag and Drop of a field in Query Studio does not work

Cause:

Possible cause:

- Browser version
- Security settings of the browser

Resolution:

A. Use double click for inserting the desired field.

In order to place the column in front of an existing column: mark the existing column and then double click on the desired new field

B. right click on the field: use the 'insert' option to insert the field

C. In Internet Explorer: add the ARC portal to the 'trusted sites' in 'Internet Options > Security > Trusted sites'-
