

## Number of loans per circulation desk

- **Article Type:** General
  - **Product:** Alma
- 

### Problem Symptoms:

In Alma Analytics we want to evaluate number of loans per circulation desk but the numbers are far too high. We suspect that In-house loans are counted as well. How can we deduct in-house loans?

### Cause:

Suspicion is correct: In-house loans are counted as well.

### Resolution:

Please filter by "in house loan indicator = N" in order to get reliable results. You find the in house loan indicator under the "Loan Details" dimension.
