

Deleted Scheduled Processes Still Running

- **Article Type:** General
 - **Product:** Rosetta
 - **Product Version:** 3.2.2
-

Problem Symptoms:

When deleting a process scheduled to run, the process still runs.

Cause:

There's a bug in the execution of deleted processes (Jira issue: DPS-12399)

Resolution:

As a workaround, if a process needs to be deleted:

1. First update to "No Scheduling", and Save
-

Additional Information

If a scheduled running process was deleted, and is still running, contact Rosetta Support.
