
No z36h.seqaa file created by file-03 run for z36h

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Problem Symptoms:

Though file-03 ("Export Database Tables") for the xxx50 z36h (Loan history) table seems to complete successfully and no errors appear in the \$alephe_scratch log, no ./xxx50/files/z36h.seqaa file is created.

Cause:

The following SQL shows that the count of xxx50 z36h records is zero:

```
xxx50@ALEPH21> select count(*) from z36h;  
**** Hit return to continue ****
```

```
COUNT(*)  
-----  
0
```

And the ./xxx50/tab/tab100 has the following setting:

```
CREATE-Z36H=N
```

Resolution:

If history records are desired for future loan transactions, set CREATE-Z36H=Y. {There is no way to have z36h records be created for past loan transactions -- though there 'is' a z35 (Event) record for each loan transaction, which has some of the same information as the z36h.}
