

Parallel link translation does not appear in OPAC

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 21
-

Problem Symptoms:

PAR link in `100LKR` field, subfield `100a` is used in order to create a parallel link.

In OPAC `Full View of Record`, after the label `Parallel` the text is `Available in other form: |` (ENG version) in both OPAC languages, ENG and BUL (Bulgarian).

Cause:

Configuration

Resolution:

The text is in English because the text is not built "on the fly", but comes from `z103_lkr_text_n` in `Z103`. The text is built by `ue_01`. On your server `ue_01` is running in English (in `prof_library` you have: `set_symbol CON_START ENG`). So the caption for PAR links is built in English. You should set `CON_START` to `BUL`.
