
Update item's Alternative Call Number in batch

- **Article Type:** General
 - **Product:** Alma
-

Problem Symptoms:

Looking to update items in bulk and populate the alternative call number field

Cause:

Functionality added to the Import profiles, in the April 2014 Release

Resolution:

The Release Notes explain:

"You can now add an item level alternative call number to New Order, Update Inventory, and Repository import profiles. This is useful to keep track of a group of items that are placed in a special location, for example. Note that the alternative call number type is taken from the call number type defined for the location."
