

rest-dlf connecting on 1892 rather than 1891

- **Article Type:** General

Problem Symptoms:

After the original installation was done with ALEPH_SUB_PORT 2, ALEPH_SUB_PORT was changed to "1" and the /exlibris/aleph/u22_2/alephe/jboss_conf/global.properties http.port was changed to "1891". But "wget localhost:1891/rest-dlf/test" is not working (while "wget localhost:1892/rest-dlf/test" *is* working.)

Cause:

When the ./jboss_conf/global.properties is changed, jbin set [globals.sh](#) has to be run to make it take effect.

Resolution:

```
> jbin [jbin is an alias]
> set globals.sh
> ./jboss_ shutdown.sh
> ./jboss_ startup.sh
> wget localhost:1891/rest-dlf/test [to confirm that it is now working].
```
