

WEBV: MARC 264 fields do not display in Classic Webvoyage

- **Product:** Voyager
 - **Product Version:** 8.2.2
-

Problem Symptoms

- WebVoyage Classic does not display bibliographic information from the MARC 264 field.
- Classic WebVoyage does not display "Publisher" information when MARC 264 is present in the bibliographic record.

Cause

There is no entry for the 264 field in display1.cfg.

Resolution

1. Open /m1/voyager/XXXdb/etc/webvoyage/local/display1.cfg in a text editor.
 2. Locate the line which reads: "260 XX abc"
 3. Immediately following this line add a line containing the following text: "264 XX abc"
