
Error: last-batch-job-no sequence is not found in USR00

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Problem Symptoms:

After upgrading to a new version, the message

Error: last-batch-job-no sequence is not found in USR00

occurs when running a batch job in the vir01 library -- even though "echo \$usr_library" shows xxx50 as the usr_library.

Cause:

The batch_que of the vir01 thinks that USR00 is the usr_library. This can happen when aleph_startup is not run after changes are made to the "usr_library" parameter in \$alephe_root/aleph_start.private (or, if not there, in ./aleph_start).

Resolution:

1. cd \$alephe_root
2. run aleph_shutdown
3. run aleph_startup

Additional Information

If the "last-batch-job-no sequence is not found" message occurs for the correct, local usr_library, consult Article 000018226 ("Error: last-batch-job-no sequence is not found" for \$usr_library)
