## Objects have Proxy Setting Checked But Not at Target Service Level

- **Article Type:** General
  - **Product:** SFX
  - **Product Version:** 4
- 

### Problem Symptoms:

On activating a Target for the first time, some Objects titles are proxied.

No Proxy is set at the Target or Target Service level,

### Cause:

An issue from the v4 upgrade process caused proxy settings to be enabled for some Object Portfolios.

### Resolution:

The incorrect Object Portfolio Proxy settings can be disabled globally by a batch command.

Contact SFX Support to have this process run.

---

## Additional Information

If there are Targets that should be directed to the proxy server, this is set at the Target Service level.
