

## p\_file\_96 and unexpected errors

- **Article Type:** General
  - **Product:** Aleph
  - **Product Version:** 21
- 

### Problem Symptoms:

Running "Generic Vendor Records Loader (file-96)" results in error messages like ...

000000001 - (0420)Invalid vendor code.

Error number: 0430

000000003 - (0430)Invalid ordering unit.

Error number: 0312

000000004 - (0312)Invalid material type.

### Cause:

Configuration of tab\_96\_def

### Resolution:

Make sure that in xxx01/tab/import/tab\_96\_def only valid values for vendor code, ordering unit and material type are included. E.g. a vendor code is only valid when it already exists in the system.
