
264 field not keyword-searchable

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Problem Symptoms:

After creating `.xxx01/tab/tab11_word` entries for the 264 field, modeled after the 260 field entries:

```
260 abef 04 WRD WIM
260 cg 04 WYR
...
264 ab 04 WRD WIM
264 c 04 WYR
```

the words in the 264 field are not retrievable in Keyword (while the 260 field words are).

(See sample 264 field in Additional information.)

Cause:

Non-blank second indicator values 264 fields, while `tab11_word` specifies that both the first and the second indicators must be blank:

```
264 ab 04 WRD WIM
264 c 04 WYR
```

Resolution:

In order to have the 264 be indexed without regard to the indicator values, change the `tab11_word` entries to these:

```
264## ab 04 WRD WIM
264## c 04 WYR
```

Additional Information

Sample 264 fields: `264 1 $$$aToronto, Ontario :$$bPlangere Editions,$$c[2014]` `264 4 $$$a?,?©2014. util f/1/28` ("Display Word Indexing for a Single Record") can be useful in diagnosing such problems.
