

## Primo extract creates empty tar.gz files

- **Article Type:** General
  - **Product:** Voyager
  - **Product Version:** 8.2.2
- 

### Problem Symptoms

- Primo extract in Voyager produces \*.tar.gz files that are 45 bytes in size in /m1/voyager/xxxdb/primo/Publishing/bundled/
- Primo pipes fail when attempting to extract 45 byte \*.tar.gz bundles.

### Defect Status

A permanent fix is integrated into Voyager 9.1.0 and higher.

### Workaround

Delete 45 byte files from /m1/voyager/xxxdb/primo/Publishing/bundled/ to allow Primo to harvest remaining files.
