

top" shows high CPU "rpciod" process

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 22
-

Problem Symptoms:

The Unix "top" command is showing something called "rpciod/2" using 20-25% of the cpu -- and the response time is slow.

Cause:

Uncertain.

Resolution:

This process disappeared on its own after several days, and (at least over the following two weeks) has not returned.
