## Login Fails due to PoolableConnectionFactory Error

- **Article Type:** General
- **Product:** Voyager
- **Product Version:** 8.0.0

---

### Problem Symptoms

In /m1/voyager/xxxdb/tomcat/logs/catalina.out:

```
Aug 22, 2014 3:29:27 PM org.apache.catalina.core.StandardWrapperValve invoke SEVERE: Servlet.service() for servlet [AuthenticatePatronService] in context with path [/vxws] threw exception [Servlet execution threw an exception] with root cause
```

```
java.lang.IllegalStateException: jdbc/voyager Not declared: javax.naming.NamingException: Cannot create PoolableConnectionFactory (Io exception: The Network Adapter could not establish the connection)
```

### Cause

Incorrect server value in /m1/voyager/xxxdb/tomcat/conf/server.xml

### Resolution

1. Edit /m1/voyager/xxxdb/tomcat/conf/server.xml
2. Replace localhost with the database server's hostname in this line: url="jdbc:oracle:thin:@localhost:1521:VGER"
3. Restart Tomcat with the "/m1/voyager/xxxdb/tomcat/tsvrcctl restart" command.
