
Cannot log in to sqlplus: user lacks CREATE SESSION privilege

- **Article Type:** General
 - **Product:** Aleph
-

Problem Symptoms:

A certain user cannot log in to SQL plus. This is seen when trying to log in:

```
>s+ xxx01
```

```
SQL*Plus: Release 11.1.0.7.0 - Production on Thu Dec 4 15:07:04 2014
```

```
Copyright (c) 1982, 2008, Oracle. All rights reserved.
```

ERROR:

```
ORA-01045: user XXX01 lacks CREATE SESSION privilege; logon denied
```

Cause:

The user may be missing the ALEPH_SCHEMA role.

Resolution:

To check if the user is missing the ALEPH_SCHEMA role:

```
>sqlplus ALEPH_DBA/[ALEPH_DBA password]
```

```
SQL>select * from DBA_ROLE_PRIVS where grantee='XXX01' and GRANTED_ROLE='ALEPH_SCHEMA';
```

If there are no results, you can fix this with the following command:

```
SQL>grant ALEPH_SCHEMA to XXX01;
```
