
Remove all the E-Activation tasks when deleting a package

- **Article Type:** General
 - **Product:** Alma
-

Desired Outcome Goal:

Delete a package such that the associated E-Activation tasks for the deleted portfolios are also removed

Procedure:

1. Create a logical set of portfolios by querying find electronic portfolios where electronic collection name is <package name>.
2. Run the job delete electronic portfolios. This job deletes the E-task associated to the portfolios.

Additional Information

Deleting a Local Package in the institutional zone will cause the E-Activation tasks to remain for any associated portfolios.
