

Add bib_id when exporting records?

- **Product:** Voyager
 - **Product Version:** 8.2.2
-

Question

I need to add bib_id to my records when I export them, but I don't see a parameter that does that. Is it possible to add the bib_id?

Answer

MarcExport will automatically add bib_id to the record in the 001 field on export. This is the default behavior and requires no configuration or additional parameters to be applied.
