
Configuring Anonymization of fulfillment activities and Archiving historical information

- **Article Type:** Q&A
 - **Product:** Alma
-

Question

How to anonymize (scrub) user information regarding completed loans, fines and fees, requests, and resource sharing requests?

Answer

Go to Alma Configuration > Fulfillment > Fulfillment Jobs Configuration > Anonymization Job

Activate the **Anonymization Job** and its Rules. Select **what to Anonymize** (loans, fines and fees, requests, and resource sharing requests), and also the **Rules**.

The job which will perform this masking of data is: "Fulfillment - Handle Historical Archiving".

If fine/fee is linked to a returned loan, the information is not anonymized, until payment.

Additional Information

More about this feature is in the [Online Help](#).

Note that if data is **not** anonymized, historical loans can be viewed by the user, in **Primo**.

Achieved via: General > General Configuration > General Configuration > Other Settings > view_historical_loans_in_primo. (To enable users to see their history of loans, the value is: true)
