## SpineOMatic - user roles

- **Article Type:** Q&A
  - **Product:** Alma
- 

---

### Question

We're going to test SpineOMatic, and I need to obtain credentials to access the Alma Label Print Web Service. Will any staff user login work for this, or is there a specific role that I need to make sure and scope to?

---

### Answer

No user role is required, all REST api calls go through the same user (exl\_api). Access is dependent on the configuration of the apikey, the permission need to be BIBS.

---

### Additional Information

SpineOMatic documentation available from Boston College at [http://arc.bc.edu:8080/Getfile/get?file=SpineOMatic\\_4.31\\_documentation.doc](http://arc.bc.edu:8080/Getfile/get?file=SpineOMatic_4.31_documentation.doc)
