

SysAdmin: Why Can't Changes be Saved to New Index?

- **Product:** Voyager
 - **Product Version:** 8.2.0
-

Question

Why is the Save button inactive after making changes? The goal is to suppress some new authority left-anchored indexes from Staff client searches.

Answer

New indexes are shipped without selections made in System Administration > Search > {index} > Search Results. Populated Selected Bib Text in the Search Results tab will activate the Save button.
