Question

After running „Create Links Between Records (manage-12)” error message "Oracle error: io_z103_write: unique constraint (XXX01.Z103_ID) violated" appears some times in the log file. Why? Error message occurs for records with linking field where the target record is not available.

Answer

Message "unique constraint (SGB01.Z103_ID) violated" is a warning in this case because of the missing target record. It may be ignored.
