
p_circ_51 using default values, not customized

- **Article Type:** General
- **Product:** Aleph
- **Product Version:** 19.01

Description:

Several of our sublibraries have unique handling costs and fixed prices defined in tab34. When we run cir_51 using the "Bills for Lost Material" radio button the system applies the default values.

Resolution:

Column 5 is hash filled where it should just have a single hash if you want it to match any call number. Try changing that and restarting the PC server.

Additional Information

p-circ-51 cir-51
