
Enable and Export OPAC Search Log in WebVoyage

- **Article Type:** General
 - **Product:** Voyager
 - **Product Version:** 8.2.1
-

Desired Outcome Goal:

Enable and export the OPAC search log for WebVoyage

Procedure:

The OPAC search log for WebVoyage is disabled by default. To enable logging:

1. On the Voyager server, open voyager.ini in a text editor. This file is located at: "/m1/voyager/xxxdb/ini/"
2. Locate the line that begins with "LOGSEARCH=" and set the value to "Y".
3. Save and close the file.

To export the OPAC search log:

1. On the Voyager server, navigate to: "/m1/voyager/xxxdb/sbin".
2. Run Popacjob
3. Select option 1: "Opac Search Log Export"
4. Input a date range to export using the format: "yyyy-mm-dd:yyyy-mm-dd"
5. The log will be named opsrchlgexport.dat and can be found at: /m1/voyager/xxxdb/rpt

Additional Information

No OPAC search logging happens until you set LOGSEARCH=Y. Only searches conducted from that point forward will be logged.

Category: Opac
