
How to Remove Extra Blank Lines from Plain Templates?

- **Article Type:** General
 - **Product:** Aleph
 - **Product Version:** 20
-

Description:

How can we remove the blank space between the paragraphs in the email (example below)

I could edit the plain-lost-material-summary-02.xsl and other xsl templates according to Support's "How to reduce extra line spaces in xsl forms" and reduce some of the extra blank lines in the Print templates.

However, in the email that uses the plain-xxx.xsl templates, I can't remove the blank lines.

Dear Sir/Madam,

[---how to remove this blank?--]

following is a list of items we already have asked you to return several times. Since we have not heard from you we assume that they are lost. We are sending you a bill so you can pay for the replacement of the items. If you however return the items to the library you will only have to pay the extra costs, consisting of the handling fee and the notice charge.

Circulation Department

Resolution:

As you can see below, there is no single cause. Each section has its own issues and fixes need to be made in both the letter xsl file and multiple plain-funcs files.

Please see full answer by Joan Kolarik attached.
