## Setting the default skin in WebVoyage

- **Product:** Voyager
- 

### Question

How to change default skin for WebVoyage interface?

### Answer

1. SSH to server as voyager user

2. `cd /m1/voyager/xxxdb/tomcat/vwebv/context/vwebv/WEB-INF`

3. Open web.xml for editing.

4. Find this parameter:

```
<init-param>
  <param-name>DefaultSkin</param-name>
  <param-value>en_US</param-value>
</init-param>
```

5. Edit `<param-value>` with desired default skin. Must be an existing skin directory under vwebv's ui directory.
6. Save file.
7. Restart tomcat process for web.xml changes to take effect.

### Additional Information

WebVoyage displays en\_US by default if no change is made.
